Water cleaning in three simple steps

1. Remove any excess residue on the upholstery.
2. Apply water over the stain, either directly or using a damp cloth. Wait a few seconds.
3. Press down over the stain with the damp cloth and rub gently over the fabric using circular movements. If the stain does not come off completely, repeat the process as required.

Now, you can clean stains with just water

Aquaclean Technology® enables you to get rid of small stains such as wine, coffee, food and even most marker pens without having to wash with soap or detergent.

Maintenance and cleaning

• LIQUIDS OR OILS
